Maier-Sports AROSA ski shirt

This season there is only one ski shirt from Maier-Sports. This is the AROSA that is part of the Ski Racing collection.

The features include a zip neck with underlay, and it is made from the DryProtec material. This is fast drying and offers comfort in use through the breathable properties. There are elasticated cuffs and a stand-up collar which are essential in this type of garment.

This is an example of a good quality product from a company with the experience of manufacturing specialist products. All the features you require are included, so you do not have any problems.

Colours	Sizes
Black	10/12
White	8/10/12/14

General Notes

This product is designed mainly for skiing, but could also be used in many other situations. Any outdoor activity where you normally feel cold, would probably be improved by wearing this product.

Has this product helped you? It would be interesting to learn about the different uses that people have found for this item. A list of uses could be shown in an update to this sheet, which could help a few other people.

Features?

Dryprotec

This is the general name of a fabric used in many Maier-Sports products. The content of the material varies between items, but the name shows the user the expected features of the garment.

You can expect comfort in use through the quick drying breathable properties of this material. It is also an easy-care product requiring less of your time.
