

Maier-Sports Big Vanilla Ladies Fleece Shirt

Maier MPT Range

This range uses technically advanced materials to produce clothing for the most demanding conditions. The products

Big Vanilla Fleece Shirt

are normally skiing trousers and jackets for the winter range.

This year there is a fleece top (shirt) the Big Vanilla for ladies in this range. If you are interested in this type of product, this item must be worth a look.

The features include a zip neck with

underlay, and it is made from the DryProtec material. This is fast drying and offers comfort in use through the breathable properties.

Features?

General Notes

This product is designed mainly for skiing, but could also be used in many other situations. Any outdoor activity where you normally feel cold, would probably be improved by wearing this product.

Has this product helped you? It would be interesting to learn about the different uses that people have found for this item. A list of uses could be shown in an update to this sheet, which could help a few other people.

Dryprotec

This is the general name of a fabric used in many Maier-Sports products. The content of the material varies between items, but the name shows the user the expected features of the garment.

You can expect comfort in use through the quick drying breathable properties of this material. It is also an easy-care product requiring less of your time.
