Gonso Toblach ski shirt

This product is from the Gonso Nordic Fitness range. They are designed to provide good warmth

with breathable properties. They are also designed with good wind protecting properties. This combination of features requires specialist materials.

The detail of the Toblach includes a Stand-Up collar, a fine stitched zipper, and a small

pocket at the side. This combination of features makes this a good product for colder activities in the winter.

General Notes

This product is designed mainly for skiing, but could also be used in many other situations. Any outdoor activity where you normally feel cold, would probably be improved by wearing this product.

Has this product helped you? It would be interesting to learn about the different uses that people have found for this item. A list of uses could be shown in an update to this sheet, which could help a few other people.
